Selfie Matches ID

vID™ Identity Verification

Modernize Candidate Verification with Secure Digital Identity Credentials

vID™ Identity Verification unlocks a smarter, faster, and more secure way to verify candidate identities. Instantly confirm an applicant's credentials and government-issued documents using next-generation, FCRA-compliant digital identity technology.

vID™ 3-Step Identity Verification Workflow

VERIFICATION > **VALIDATION** > **REPORTING**

CANDIDATE VERIFICATION

Candidates complete a simple mobile process by providing consent, taking a selfie, and scanning their government-issued ID.

IDENTITY VALIDATION

AI-powered technology verifies the ID, performs biometric selfie matching with liveness detection, and confirms identity in minutes.

INSTANT REPORTING

An instant verification report and reusable digital identity credential deliver upfront confidence and a faster, cleaner screening process.

RESULT

By verifying identity upfront, employers reduce fraud risk, eliminate identity uncertainty, and avoid downstream delays caused by mismatched or incomplete information.

Next Step

Add vID™ to your screening process and start every background check with verified identity and stronger fraud protection.

Comprehensive Screening Services

- Background Checks: International, National, State, County, Federal, Civil

- National Network for Drug Testing and Occupational Health Screening

- Identity Verification

- Employment, Education, and License Verifications

- DOT products, including electronic FMCSA and DOT forms

- Electronic I-9 Forms and eVerify
